M U L T I - R O O M A U D I O S Y S T E M

THE IP-BASED DISTRIBUTED ENTERTAINMENT COMPANY.

ENJOY DIGITAL MUSIC THROUGHOUT YOUR HOME

The *Musica* Multi-Room Audio System can enhance the quality of your life at home by allowing you to enjoy the same or different music in any or all rooms of your home without the clutter or inconvenience of multiple stereos. Whether you're entertaining guests, doing work around the house, or just relaxing, Multi-Room Audio is a great way to enjoy music wherever and whenever you please. *Musica* provides the best audio quality and ease of use at a reasonable price, incorporating state of the art components (such as Burr-Brown® 192kHz/24-Bit D/A converters and high quality Texas Instruments® digital amplifiers). By placing the amplifier in the keypad in each room, closer to the speakers, *Musica* offers audio performance unmatched by other Multi-Room Audio systems.

- 5-band graphic equalizer in each keypad.
- 3D Sound Mode in select keypad models.
- An optional FM tuner card for any keypad.
- Easily check the status of other rooms in the system.
- Shut the entire system down from any location by pressing and holding the Power button.
- Turn ON the entire system by pressing and holding SRCE button.
- Control *Musica* from a PC, web tablet, or PDA.

We know that not all family members can agree on what music they like. That's why the *Musica* system allows for the addition of two sources in each room for in-room playback only. Add an Audio Port in the room and connect an iPod®, computer, mini system or other audio source to the audio input connector for in-room playback only. You can also use the audio output connection on the Audio Port to add a subwoofer or external amplifier if desired. Additionally, all *Musica* keypads can be upgraded for in-room FM Tuner listening with an optional Digital FM Tuner card.

Add an FM Tuner to any keypad!

INTUITIVE AND INTERACTIVE IN-WALL KEYPADS

The *Musica* Multi-Room Audio system's in-wall amplified keypads put studio quality music at your fingertips in each room of your home. These attractive in-wall amplified keypads are so easy to use that every member of your family can easily choose what they want to listen to in their room without reading a manual. Select and control the sources available on your system using touch-friendly buttons. An attractive LCD screen provides the status of the system and guides you through controlling audio in the room as well as other rooms in your home. Three models are available with different amplification and backlighting so you can mix and match the keypads to fit each room in your home. Choose between White, Almond, Ivory or Black faceplates to match your décor. Your *NetStreams*-Authorized custom installer can help you choose which model is best for each room in your home.

ENHANCE YOUR LIFE AND YOUR HOME

The *Musica* Multi-Room Audio system can enhance your life at home, by allowing different members of the family to choose what they want to listen to in their rooms. So, while one person may be in the mood for rock in the living room, you can listen to jazz in the kitchen.

Did you know that installing a Multi-Room Audio system can increase the market value of your home? One of the top trends to hit the home building industry is Multi-Room Audio. The *NetStreams'* *Musica* system not only provides great audio quality, but also is durable and reliable, making it one of the smartest trends in home improvement.

MUSICA™

IN YOUR HOME

In-wall amplified keypads allow for easy source selection. Choose from three models. (see below)

Listen to music outdoors! Your installer may hide an MU290 Power Amplifier in a closet to give your outdoor area more power.

Combine Musica with Panorama™ and enjoy Multi-Room Video as well.

(Panorama PAN6400 Video Distribution Center and two Panorama PANVP500's Video Ports shown here.)

Listen to your Multi-Room Audio system over your home theater speakers with an Audio Port.

Control your Musica system from a PC, wireless web tablet, or PDA using the Musica MUR2EM Network Interface Module.

Control the Musica system using the remote control.

one MURC remote included

Optional KLI-R

The Musica Audio Distribution Center manages and distributes up to 4 audio sources to all rooms.

Connect a local source like a computer, iPod® or CD player to the Audio Port for playback in that room.

Add a Musica FM Tuner card to any Musica keypad as another source for local room playback.

CONTROL YOUR *MUSICA* MULTI-ROOM AUDIO SYSTEM FROM A PDA OR YOUR PC

The MUR2EM features an eye-catching and intuitive user interface, enabling users to control all of their audio sources using a web browser on a PC, web tablet, or PDA*. The MUR2EM Network Interface provides seamless control of up to 18 rooms of audio, featuring an RS-232 port for quick and easy connection to the *Musica* Audio Distribution Center. Turn the music on and off in any and all rooms in your home. You can also select which source you want to listen to, and transfer audio from room to room.

* PDA must be capable of running Macromedia® Flash®.
